# ATLAS BREW STAND

Congratulations on your purchase of the Acaia Atlas brew stand. This quick start guide will walk you through the basics of setting up and using your Atlas.

Made of durable aluminum alloy material, the Atlas is built to the highest standards of quality. The streamlined design makes the Atlas easy to disassemble, store, and clean. Form and functionality combine to offer you an entirely new experience of using brew stands.

Designed to contribute to consistent brews, the Atlas can be used to measure coffee to water ratio with an Acaia Pearl, coffee to beverage ratio with an Acaia Lunar, and real-time extraction ratio with a dual scale setup. The durable design also allows the Atlas to withstand the downward force when brewing an AeroPress®.

Atlas Base   Filter Supports   Screws   Anti-slip Pads

## ASSEMBLY GUIDE

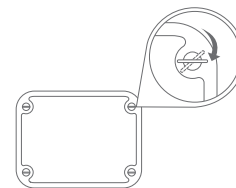

### 1 BEGIN ASSEMBLY

Turn the Atlas upside down and use the four screws to secure the supports to the base.

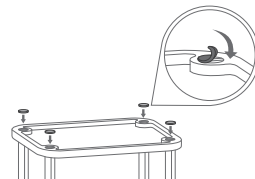

### 2 MOUNT THE BASE

Fasten the filter supports to the base by using a coin to tighten the screws.

### 3 ATTACH ANTI-SLIP PADS

Remove the adhesive from the anti-slip pads. Press to attach the pads to the screw holes.

### 4 ASSEMBLY COMPLETE

Turn the stand over. Ensure that the base is firmly attached.
