# PROTECTIVE FILM FOR PEARL SERIES

The protective film for Acaia Pearl series is precisely designed to fit the Acaia Pearl series collection. The slim and transparent coating with round corners offers scratch protection for your Acaia Pearl series weighing platform. It maintains the clarity of the scale display while not interfering with the touch sensitive buttons.

- Easy to apply
- Transparent
- Does not affect touch-button responsiveness
- Self-adhesive coated
- Round corners
- 0.11 mm thickness

Step 1
Clean the weighing platform, ensuring that no dust or dirt remains on the surface.
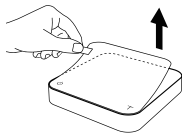

Step 2
Peel back label.
Avoid touching the backing so your protective film stays clean and fingerprint-free.

Step 3
Align the film to the edge of the weighing platform. Then, while holding it in place, slowly apply the protective film, starting at one edge and moving to the opposite edge. It helps to use a straight edge (e.g., a credit card) to apply even pressure across the film.

Step 4
Carefully peel back label.
